Streamlining IT Procurement

Ideation Phase – Completed Artifacts

Date	30 September 2026
Team ID	**SWTID-2026-2123**
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Primary Platform	ServiceNow

Scope: Brainstorm & Idea Prioritization

2. Brainstorm & Idea Prioritization Template

Step 1: Team Gathering, Collaboration and Select the Problem Statement

Selected problem statement focus: Standard Laptop requests can involve manual configuration-task handling after approval, creating delays, uncertainty, and additional manual effort.

Step 2: Brainstorm, Idea Listing and Grouping

Idea Group	Idea	User / Process Benefit	Implementation Fit
Request Experience	Keep Standard Laptop as a clear Service Catalog item with Order Now.	Makes the request path easier to discover and follow.	High
Approval Automation	Use Approved request state as the automation trigger condition.	Creates a clear handoff from authorization to fulfillment.	High
Task Automation	Automatically create a Catalog Task after approval.	Removes manual task creation and reduces missed/delayed tasks.	High
Assignment	Set the generated Catalog Task assignment group to Hardware.	Gives the configuration work clear ownership.	High
Task Details	Populate short description and description with	Provides consistent task context for the Hardware team.	High

	"Laptop need to Configured".		
Status Visibility	Expose Requested Item → Catalog Tasks with task status and assignment.	Helps users and IT stakeholders understand what happens next.	High
Process Monitoring	Monitor and maintain the flow for repeatable Standard Laptop requests.	Supports consistent operation over repeated requests.	Medium
Future Expansion	Extend the repeatable workflow to additional standard procurement items.	Creates a pattern for future procurement automation.	Medium

Step 3: Idea Prioritization

Prioritization is based on direct alignment with the supplied project outcome and implementation flow; it is not an additional measured business case.

Priority	**Idea**	**Impact**	**Effort**	**Reason for placement**
1	Automatic Catalog Task after approval	High	Medium	Core automation that replaces the manual configuration-task handoff.
2	Assign task to Hardware	High	Low	Directly establishes ownership for configuration.
3	Use Approved state as trigger condition	High	Low	Connects authorization to automated fulfillment.
4	Standardize task description	Medium	Low	Creates consistent task information.
5	Status visibility	Medium	Medium	Supports understanding of task status and ownership.
6	Clear Standard Laptop catalog item	Medium	Low	Supports a straightforward request path.
7	Flow monitoring and maintenance	Medium	Medium	Supports repeatability over time.
8	Extend pattern to other procurement items	Medium	High	Potential future extension beyond the supplied Standard Laptop scope.
