# Streamlining IT Procurement

*Ideation Phase – Completed Artifacts*

| | |
|---|---|
| **Date** | 30 September 2026 |
| **Team ID** | **SWTID-2026-2123** |
| **Project Name** | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer |
| **Primary Platform** | ServiceNow |

## **Scope:** Empathy Map Canvas

# 1. Empathy Map Canvas

*Empathize & Discover*

**Primary persona: Employee / Requester**

The canvas is tailored to the supplied journey-map content, especially the requester's goals, interactions, positive/negative moments, and opportunities.

| | |
|---|---|
| **SAYS** | "I need a standard laptop."<br>"Help me request a standard laptop quickly."<br>"Help me submit the correct request."<br>"Help me know whether my request is approved."<br>"Help me understand what happens next." |
| **THINKS** | The request should be simple and easy to find.<br>The correct Standard Laptop item should be clear.<br>After approval, the configuration task should be created without another manual handoff.<br>I should be able to see the request/task status. |
| **DOES** | Opens ServiceNow Service Catalog → Hardware → Standard Laptop.<br>Selects Standard Laptop and Order Now.<br>Submits the request and waits for approval.<br>After approval, the request/task can be inspected through Requested Item → Catalog Tasks. |

| | |
|---|---|
| **FEELS** | Positive: confidence when approval gives authorization and when task status/assignment is visible.<br>Negative: uncertainty about where to start, waiting for approval, and uncertainty about what happens next. |
| **PAINS** | Manual steps can create uncertainty.<br>Waiting for approval can delay fulfillment.<br>Without automation, configuration tasks may be missed or delayed.<br>Manual follow-up may otherwise be required. |
| **GAINS** | Quick, clear Standard Laptop request.<br>Repeatable approval-driven fulfillment.<br>Automatic creation and Hardware assignment of the Catalog Task.<br>Clear status and ownership.<br>Reduced waiting and manual intervention. |

**Key insight:** The requester needs a clear, repeatable path from Standard Laptop selection through approval to visible fulfillment status; the main opportunity is to remove the manual configuration-task handoff.
